

Analysis of SNMP Using Wireshark with Classification Traffic and Monitoring with RapidMiner dan Orange

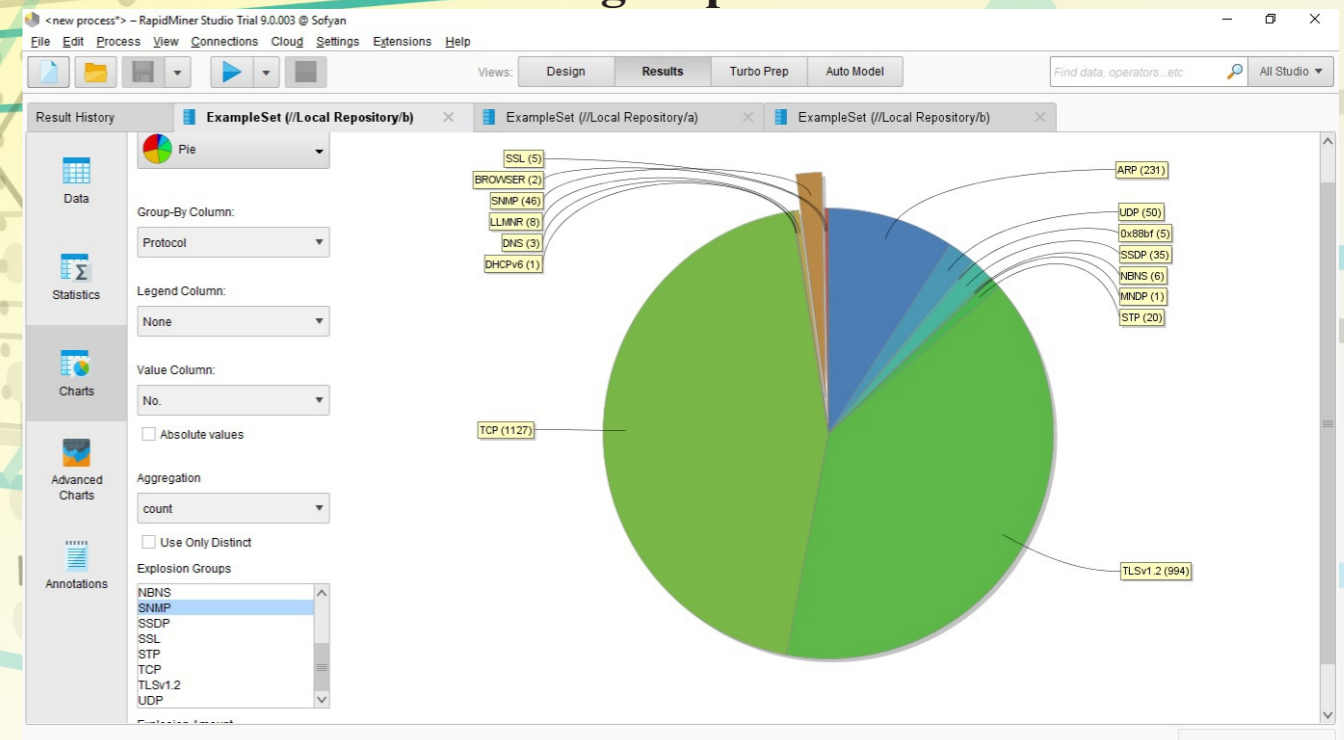

Capture SNMP Using Wireshark

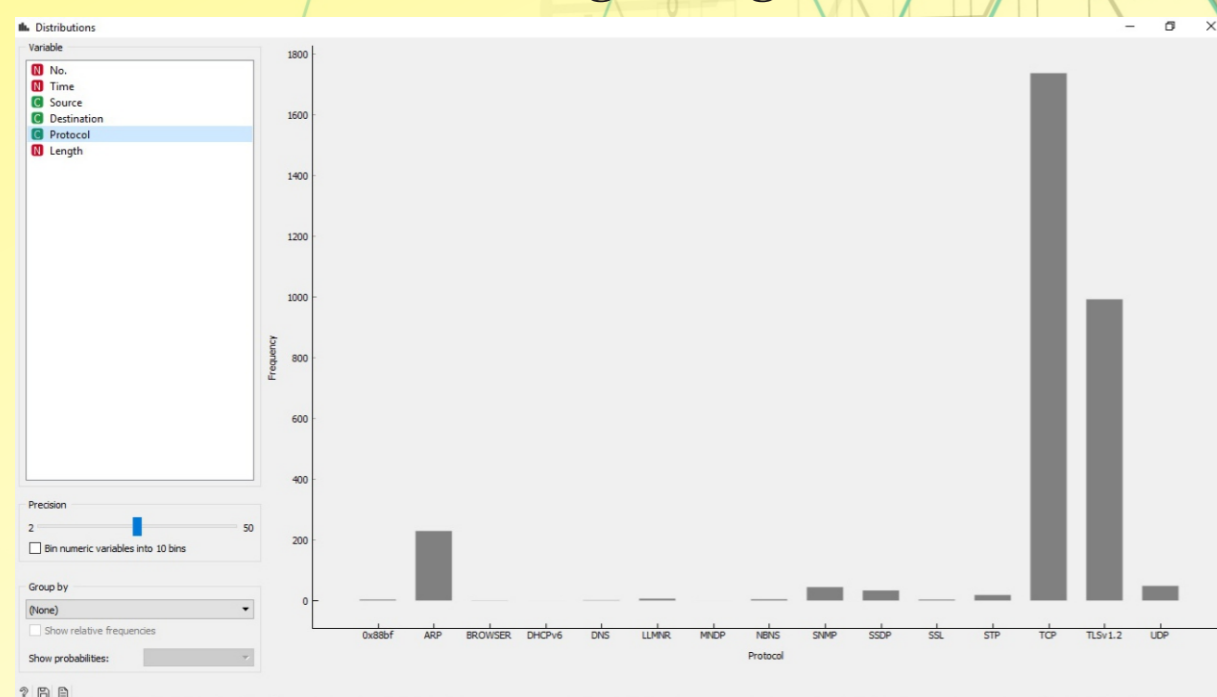

Analysis of SNMP Using Wireshark

1. SNMP is a protocol that is used as a standard for conducting network device settings.
2. SNMP has 3 elements. Manager, MIB, and Agent.
3. Based on the picture beside, can we look at the "info" all SNMP's messages there is a PDU (Protocol Data Unit). The PDU is data unit consists of a header and some the data is posted. SNMP PDU is used for communication between SNMP Manager with SNMP Agent.
