

Malware Threats on The Internet

Trojan Horse

Trojan horses hide in the background and carry out their activities secretly.

Virus

A computer virus is a type of computer program that, when executed, replicates itself by modifying other computer programs and inserting its own code.

Spyware

Spyware is a software that aims to gather information about a person or organization, sometimes without their knowledge.

Worm

A computer worm is a standalone malware computer program that replicates itself in order to spread to other computers.
